

SOILEAU INDUSTRIES

Valued Customer,

Soileau Industries is a company dedicated to manufacturing High Quality PVC Fabricated Fittings. We have produced Quality Fittings for the Industrial, Municipal and Irrigation markets since 1962. I feel Soileau Industries manufactures the most economical fittings made. We offer you fittings that work as designed, the best quality control available today, and friendly, honest customer service. It would be a privilege to serve you!

M. Chadwick Soileau
President
Soileau Industries

GENERAL POLICY TERMS AND CONDITIONS OF SALES

A. Definitions: Soileau Industries, Inc., hereinafter referred to as Company; dealer, distributor, contractor, hereinafter referred to as Purchaser. All types and classes of PVC Pipe and related fittings and accessories, and all other such equipment, hereinafter referred to as Products.

B. Acceptance of Orders: All orders are subject to acceptance by the management at Soileau Industries, Inc., whether it is written, verbal, oral, telephoned, or solicited by a Company representative.

1. **Prices:** All process are subject to change without notice at any time and all products will be invoiced at the price in effect at time of shipment. Prices are for products of standard design and materials as shown on applicable and current price pages.
2. **Terms of Payment:** All orders are subject to the approval of the Credit Department, and full or partial payment may be required in advance.
3. **Past Due Accounts:** A late charge will be imposed on all past due amounts in the maximum amount allowed by law.
4. **Taxes:** All sales are considered to be taxable, unless otherwise exempt. Tax will be added to all invoices unless an exemption certificate is in the possession of Soileau Industries, Inc., prior to delivery. The purchaser shall reimburse Soileau Industries, Inc., for any sales, use, occupation, excise, or similar tax for any reason arising out of or in connection with its sale to the purchaser.
5. **Cancellation:** No order for custom designed fittings may be cancelled except upon written notice to Soileau Industries, Inc., and upon payment of all costs arising out of or in connection with the order.
6. **Incorrect Invoices:** If an error on an invoice is found, please return it to us within ten (10) days noting the error. A corrected invoice will be issued bearing a new number and date.
7. **Products Damaged in Transit:** The Purchaser shall inspect shipments upon receipt, and in the event of damages shall file a claim against the carrier. If the purchaser is in urgent need of replacements for the damaged material, he should give Soileau Industries, Inc., a new order marked as follows: "For replacement of material damaged in transit." The Purchaser shall pay the invoice for the original shipment and such replacements, then request a duplicate receipt to facilitate filing his claim against the carrier.
8. **Other Claims:** The existence of any defect which Soileau Industries, Inc., may be obligated to correct under the "Warranty and Liability" provisions will not excuse payment or justify delay in payment of any invoice.

- 9. Return of Material:** No material shall be returned without written authorization and shipping instructions first having been obtained from Soileau Industries, Inc. Any item returned must be returned freight prepaid and will be subject to a restocking charge. Returned items must be in a saleable condition to qualify for credit. The return ticket must show the invoice number and date on which each item was purchased. Items of special manufacture or large quantities are non-returnable.
- 10. Performance:** Soileau Industries, Inc., will not be responsible to the purchaser for any delay or failure in performance affecting the purchaser or others caused by circumstances beyond the reasonable control of the said company, including but not limited to the following: acts of God, riots, embargoes, strikes, other concerted acts of workmen, walkouts, slowdowns, actions or regulations of any government authority, casualties or accidents, equipment failure, war insurrection, delays in transportation, and shortages of rail cars, power, fuel, labor, or material.
- 11. Design:** Soileau Industries, Inc., reserves the right to make any change in the details of construction and/or manufacture as shown in its catalogs, bulletins, brochures, and price books which will not affect the essential features of design. If the equipment is ordered for use in an existing installation, Soileau Industries, Inc., will furnish equipment as nearly interchangeable as possible, but reserves the right to substitute the latest material and design.
- 12. Freight:** Within the Continental U.S. are F.O.B plant, unless otherwise stated in the Condition of Sale or quote
- 13. Drawings:** All drawings are representations only and are not to be used for engineering purposes. Contact factory for submittal data.

LIMITED WARRANTY AND LIMITATION OF LIABILITY

TERMS AND CONDITION OF SALE

SOILEAU INDUSTRIES, INC. (SII), 800 N.W. Railroad Ave, Ville Platte, LA 70586 warrants its products subject to the limitations hereinafter stated, to be free of defects and material workmanship under the intended use of the product for a period of one (1) year (12 months), from the date of invoice. This limited warranty extends only to the original Purchaser/end user and will be void if the product is used in any manner other than the known intended use for which the product was designed.

This Limited Warranty is limited to the repair or replacement, without charge, once SII determines the part to be defective. Purchaser must notify SII within ten (10) days of the date of discovery of any claim defect, and if requested by SII, return the defective product freight prepaid to SII FOB shipping point as shown on Purchasers invoice, or, at the option of SII, make the defective part available for inspection by SII or its designee. Should the part be determined to be defective, SII will pay the freight for shipping. SII will also pay the freight for the replacement or repaired part to Purchaser. Notice shall be in writing and sent to SII corporate offices at the address set forth above.

SII shall not be liable for any other damages other than repair or replacement, whether direct or consequential. Specifically, SII shall not bear any liability for any crop damage or other incidental or consequential damages resulting for any defects in its product.

Purchaser does hereby hold harmless SII from any and all claims, suits, or liability arising from injuries to persons or property, including death, and from any other claims, suits, or liability on account of any negligent or intentional act or omission by Purchaser or any of Purchaser's officers, agents, employees, or servants.

Purchaser shall be responsible for inspecting the material at the time of delivery and note on the bill of delivery any apparent defects.

Once goods are shipped and accepted by Purchaser payment shall be due in accordance to the terms listed on the invoice. A finance charge of one and a half percent (1.5%) per month (18% annual rate) shall be due and payable on all past due invoices.

In the event of any litigation between the parties concerning this warranty or the conditions of sale, including all trial and appellate proceedings, the venue shall be in the State of

Louisiana, Evangeline Parish and under the laws of the State of Louisiana as to all issues in dispute. The successful party shall be entitled to attorney fees, court cost and all cost of litigation. Purchaser agrees to submit to the jurisdiction of the State of Louisiana by acceptance of delivery of product from SII. Any failure or forbearance by SII to enforce any conditions of the sale or of this warranty shall not constitute a waiver or relinquishment of any of SII's rights and remedies.

Neither party shall assign its rights and duties under the contract of sale or this warranty without the others prior written consent. Any amendments or modifications to either shall be in writing and signed by both parties. The parties do acknowledge that any deviation or variation of the provisions of the Uniform Commercial Code or by agreement of the parties and shall have precedence unless specifically prohibited under Louisiana law.

However, before litigation is instituted for a disputed claim, the parties agree to submit the alleged defective part for independent testing. All cost in connection with such testing shall be born by the party proved incorrect in the allegations pursuant to the results of a third party tester.

Lastly, SII disclaims all express warranties other than those contained within this document. There are no warranties that extend beyond those described herein and SII shall not be liable for any special, indirect, incidental or consequential damages of any kind, including but not limited to lost profit, business interruption losses, loss of goodwill, loss of business or loss of customer relationships. Verbal statements of any person associated with SII as an owner, manager, employee, or agent which may tend to expand the warranty set forth herein shall be null, void, and unenforceable unless made in writing and signed by both parties herein.

The statute of limitations in any action commenced shall be one (1) year of the date of sale. Notification in writing to SII by Purchaser within ten (10) days of the discovery of the defect shall interrupt prescription, and thereafter Purchaser shall have one (1) year from the date of discovery of an alleged defect to commence a cause of action.

WARNING

Soileau Industries, Inc., does not recommend the use of thermoplastic piping products for systems to transport or store compressed air or gas, or the testing of thermoplastic piping systems with compressed air or gases in any situation. The use of our product in compressed air or gas systems automatically voids our warranty, and its use is entirely the responsibility and liability of the user. Great bodily injury and possible death can result from the eruption of thermoplastic piping products used in systems for compressed air or gases. Soileau Industries Inc., will not accept responsibility for damage or impairment of its products, or other consequential or incidental damages caused by misapplication, incorrect assembly, and/or exposure to harmful substances or conditions.

INSTALLATION INFORMATION

Thermoplastic piping systems should be engineered, installed, and operated in accordance with established engineering standards and procedures for thermoplastic piping systems.

SOLVENT WELDING – use a quality grade of primer and solvent cement formulated for the type of connection, with an applicator 1/3 the diameter of the pipe. Read and follow all of the solvent cement manufacturer's application instructions.

THREADED CONNECTIONS – only use a quality grade of Teflon tape for use in joining plastic threaded connections.

GASKET CONNECTIONS – Gasket area and pipe or spigot end should be clean and free of dirt and debris. Do not attempt to remove the formed-in gasket (Figure 1). Lubricate the entire sealing surface of the gasket and the pipe or spigot end with a light coating of a suitable lubricant (Figure 2). Push the pipe or spigot end into the gasket bell while maintaining a straight alignment. The proper insertion depth is equal to the total gasket bell length minus one-half inch (1/2") (Figure 3)

Figure 1

Figure 2

Figure 3

THRUST BLOCKING – Water under pressure exerts thrust forces in piping systems. Thrust blocking should be provided, as necessary, to prevent movement of pipe or appurtenances in response to thrust.

Types of thrust blocking:

1. Through line connection, tee
2. Through line connection, cross used as tee
3. Direction change, elbow
4. Change in line size, reducer
5. Direction change, tee used as elbow
6. Direction change, cross used as elbow
7. Direction change
8. Through line connection wye
9. Valve anchor
10. Direction change vertical, bend anchor
11. End caps (above or below ground)

Thrust blocking is required wherever the pipeline:

- Changes direction (e.g. tees, bends, ells, and crosses)
- Changes size at its reducers
- Stops, as at dead ends
- Valves and hydrants, at which thrust develops when closed

Size and type of thrust blocking depends on:

- Maximum system pressure
- Pipe size
- Type and size of fittings or appurtenances
- Line profile (horizontal or vertical bends)
- Soil type

FLANGE CONNECTIONS – Once a flange is joined to pipe, the method for joining two flanges is as follows:

- (A) Piping runs joined to the flanges must be installed in a straight-line position to the flange to avoid stress at the flange due to misalignment. Piping must also be secured and supported to prevent lateral movement, which can create stress and damage the flange.
- (B) With gasket in place, align the boltholes of the mating flanges by rotating the ring into position. (Consideration should be given to alignment of one-piece flange prior to joining with pipe.)
- (C) Insert all bolts, washers (two standard flat washers per bolt) and nuts
- (D) Make sure the faces of the mating surfaces are flush against gasket prior to bolting down the flanges.
- (E) Tighten the nuts by hand until they are snug. Establish uniform pressure over the flange face by tightening the bolts in 5-ft lbs. increments according to the sequence shown in Figure 1 following a 180° opposing sequence.

Flange Size	Recommended Torque (ft.Lbs)
1/2 - 1 1/2	10 - 15
2 - 4	20 - 30
6 - 8	33 - 50
10	53 - 75
12	80 - 110
14 - 24	110

(F) Care must be taken to avoid “bending” the flange when joining a flange to a “raised face” flange, or a wafer-style valve. Do not use bolts to bring together improperly mated flanges.

CAUTION: Unnecessary over-torquing will damage the flange.

IMPORTANT

WATER HAMMER – Soileau Industries Inc., recommends that all PVC and CPVC plastic piping systems be designed and constructed to AVOID EXCESSIVE WATER HAMMER. Water hammer can cause damage and failure to pipe, valves, and fittings within the piping system.

NOTE – When temperatures rise above 73°F, the tensile strength of thermoplastics decreases, thereby derating the pipe or fitting Maximum Internal Pressure. When temperatures fall below 73°F, the tensile strength of thermoplastics increases. However, the impact strength decreases. Maximum operating temperatures for PVC piping systems should not exceed 140°F (110°F threaded systems). Maximum operating temperatures for CPVC piping systems should not exceed 200°F (150°F threaded systems).

PIP & IPS FITTINGS

Soileau Industries certifies that all pressure fittings are manufactured in accordance with ASTM and NRCS standards. For a list of standards, please contact our office.

All fittings must be installed in accordance with procedures as outlined in Unibell Handbook of PVC pipe with special attention given to proper gluing procedures, over deflection, over insertion and air entrapment where applicable.
